

A circular diagram representing the distribution of 20 sampling points. The points are marked with asterisks (*) and are arranged in two concentric rings of ten points each. Dashed lines form concentric circles and radial lines. Two angles are labeled: 30° at the top right and 18° in the upper left quadrant. Several points are labeled with bold letters: 'G' appears four times (top-left, top-right, bottom-left, and bottom-center), 'R' appears once (bottom-right), and 'BR' appears once (far bottom-right). Some labels are accompanied by short horizontal or vertical dashes.
